

Please do not stop the XM Instant Traffic and Weather. My wife and I travel for my work and we listen to XM all the time. When we are near one of the towns on the Instant Traffic, we tune the station in and it helps us avoid the congestion and get through the city faster. The weather helps us through the whole country and keeps us in tune with where the bad weather is and we can travel around it if possible. These channels are essential in our travels and we would not like to see them off the air.
